MOTT ANNOUNCES EXPANSION OF ITS BRANTFORD, ONTARIO MANUFACTURING FACILITY

March 4, 2015 – Brantford, Ontario Canada

Mott recently broke ground on the expansion of its Brantford, Ontario manufacturing facility. Mott's new, larger facility will streamline operations and improve traffic flow, following the company's Lean manufacturing philosophy to maximize efficiency and reduce waste. This new facility will be one of the leanest, most modern manufacturing plants in North America. Along with the expansion new equipment will be added for increased production capacity to support the growing demand for its products.

The expansion project began late November 2014 and expected to be complete in June 2015; this will add approximately 45% additional manufacturing space. The project will be Mott's second expansion to its 12 year old Canadian facility; the first expansion was completed in 2010.

In addition, Mott is striving towards ISO 14001 certification. ISO 14001 helps organizations minimize their environmental footprint by setting out criteria for environmental management systems.

ABOUT MOTT MANUFACTURING: Mott is a manufacturer of steel and wood laboratory casework and fume hoods with factories in Brantford, Ontario, Maxwelton, WV and Bedford, VA. Markets served are university teaching & research, industrial, biotech, pharma, healthcare, government, and K-12.
